Summary

As a recent Computer Science Engineering graduate, I have a strong foundation in programming and a passion for software development. With proficiency in C, C++, Java, HTML, CSS, and JavaScript, I am well-equipped for full-stack web development and software engineering. Through diverse projects, I have demonstrated my ability to solve real-world challenges effectively. I am eager to contribute my skills and drive impactful solutions as part of your team.

Skills

Technical Skills: C · C++ · Java · Html · Css · Javascript · SQL · Git · github

Projects

Coverpage-Generator:

This is the Web App created for the students of my college department which can be used to generate the coverpage of the lab reports without any hassle student just need to enter the required information in the all the input fields and upon clicking the download button the pdf of the coverpage should be generated.

The technologies which i used to create this project are Html, Css and Javascript, for pdf generation i have made use of the jsPdf library.

Portfolio-Website:

My portfolio website is a visually appealing and responsive platform that showcases my skills and projects. It features sections like About Me, Projects and Contact. Users can easily get in touch with me through the contact section. The website is designed to grow as I continue to add new projects and update my skills.
